Your Products May Be Global. Your Requirements Are Not.

Registrar Corp helps cosmetics companies manage different regulatory requirements across major markets with expert support throughout the product lifecycle.

EU and UK

Support compliance in the EU and UK with Responsible Person services, CPSRs, PIF preparation and due diligence, label and claims review, and CPNP/SCPN notifications. Our team helps identify gaps, prepare required documentation, and support ongoing regulatory readiness across both markets.

United States

Meet FDA and MoCRA requirements with support for facility registration, U.S. Agent services, product listings, label and ingredient review, adverse event management, and OTC cosmetics compliance. Registrar Corp helps manage both premarket requirements and ongoing obligations after products are marketed.

California

Manage California-specific cosmetics obligations with Proposition 65 assessments, California Safe Cosmetics Program reporting, and complete formula-compliance review. Our team evaluates ingredients, concentrations, and potential reporting triggers so companies can address requirements before they become compliance issues

Canada

Meet Health Canada requirements with support for Cosmetic Notification Forms, formula compliance, ingredient review, safety evidence, bilingual labeling checks, Responsible Person requirements, and OTC cosmetics compliance. Registrar Corp helps verify that product information, formulations, labels, and market-entry documents align with applicable Canadian cosmetics requirements. .

Stay compliant, confident, and competitive in the ever-changing cosmetics landscape.
